## Work History

### Software Engineer (Full-time Remote)

Jan 2024 - Current

Founder and Lightning

Mohali

- Developed and maintained the company's internal dashboard, creating data visualization tools and graphs using recharts for data analysis to enable efficient data analysis and informed decision-making.
- Implemented SEO and performance optimizations, resulting in faster page load times, improved search engine visibility, and a 12% increase in website traffic.
- Actively participated in code reviews, shared knowledge, and promoted team-wide best practices, leading to improved code quality and streamlined workflows.
- Integrated new features into existing systems, increasing capabilities and improving overall performance.

### Software Engineer (Full-time Remote)

Feb 2022 - Dec 2023

Winux Software Solutions

Mohali

- Remotely collaborated with a distributed team, designing and developing scalable architecture for web applications, achieving remote productivity
- Built a reusable UI component library leveraging React and Roll-up, improving development efficiency, enhancing code reusability, and maintaining consistent design across projects.
- Utilized Git and Agile development methodologies to manage codebase and ensure timely delivery of projects and iterative improvements, with frequent deployments.
- Mentored and guided three team members, providing technical support, skill development, and ensuring effective collaboration within the team.
- Enhanced user experience with intuitive interface design and responsive web applications.
- 

### Software Engineer (Full-time Hybrid)

Sep 2019 - Oct 2021

Chicmic

Mohali

- Proficient in using third-party libraries and tools with React-js
- Worked collaboratively with backend developers to ensure seamless integration with API endpoints
- Interact directly with clients to address issues/requests ranging from the system level to the data level
- Wrote comprehensive technical documentation, outlining software development methodologies and system workflows, enabling efficient onboarding and knowledge transfer within the team.
